Active Martian volcano at the area of Kielce University of Technology - as the announcement of ERC 2021

The 7th edition of European Rover Challenge, the biggest space & robotics event in Europe, approaches rapidly. During 10-12 September, on the site of Kielce University of Technology, teams can compete both in on-site and remote formulas. There will be lectures on flights to Mars, the Moon commercialization and the usage on Earth the technologies dedicated to space exploration. The world's largest active Martian volcano will appear at the track in Kielce - capital of the Świętokrzyskie Voivodeship.
